Dana - you could send a note saying you've referred the matter to Loren.

Thanks for the follow-up Loren. Sorry I didn't call you back today. I appreciate the update. I think it is probably best for me not to send a note to Mr. Patterson at this time. Please keep me in the loop regarding any additional contact. Take care – Happy Thanksgiving to all the Region 9 folks! - Dana

Subject: Treasure Island

Hi Dana,

I just wanted to close the loop on the recent contact HQ had from Treasure Island community member Andre Patterson. More than likely Mr. Patterson contacted EPA because of a recent newspaper article and the field work that is ongoing at the site. The Navy, at the request of the California Department of Public Health, is conducting a base wide field survey to identify any potential sources. They have made a great deal of progress on their survey and the CDPH feels very comfortable with the work the Navy is doing and does not believe that there's any significant public health threat. I contacted Mr. Patterson on Friday last week and left a message, and again today with the TI RPM, and left a message. I have not received a return call. If any additional information arises I will keep you informed.

Loren
